RE: Anti-icing Chemicals vs. Sanding Material Use
City of Oakridge
Willamette Highway

Dear Mr. Arkell:

This letter is to confirm our intentions of using anti-icing chemicals within the City of Oakridge instead of sanding material. We have essentially eliminated the use of sanding material along the Willamette Highway within the City of Oakridge. We have replaced the sanding material with an anti-icing chemical known as Calcium Magnesium Acetate (CMA). We plan to continue the use of CMA into the future. For more information about our operations, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Terry R. Thames".
